Bottle & Cap Torque Analyzers

KEY FEATURES

Accuracy $\pm 4\%$ of reading from 20% to 100% of full scale

The versatile clamping jaws securely holds a multitude of shapes and sizes within its changeable grips. It contains a maximum grip capacity of 135mm round or square.

Perfect for testing and measuring the tightness of screw-on caps for items like bottles, jars, and cans.

Certification of calibration traceable to the National Institute of Standards and Technology (NIST) supplied with all models.

Bi-directional.

Auto-stop style pointer with manual reset.

Easy to read dual scale.

Check that the correct torque has been applied to caps to ensure quality product:

- Minimal leakage and deterioration
- Safe storage and transportation
- Correctly sealed yet easy to open

CERTIFIED

Supplied with NIST-Traceable Certification of Calibration

EASY TO USE

Simply place jar into jaws, clamp jar snug (don't over clamp), then push the red reset button on the front of unit.

Then twist lid and read the torque measured on the dial indicator.
